Social Work Elective

1. The first part of the course is a lecture on the history of social work. This is followed by a series of practical exercises designed to help students understand the role of social workers in society. The course also includes a field placement where students can apply their knowledge in a real-world setting.

2.

The second part of the course is a lecture on the theory of social work. This is followed by a series of practical exercises designed to help students understand the role of social workers in society. The course also includes a field placement where students can apply their knowledge in a real-world setting.

3.

The third part of the course is a lecture on the practice of social work. This is followed by a series of practical exercises designed to help students understand the role of social workers in society. The course also includes a field placement where students can apply their knowledge in a real-world setting.

4.

The fourth part of the course is a lecture on the ethics of social work. This is followed by a series of practical exercises designed to help students understand the role of social workers in society. The course also includes a field placement where students can apply their knowledge in a real-world setting.

5.

The fifth part of the course is a lecture on the research methods used in social work. This is followed by a series of practical exercises designed to help students understand the role of social workers in society. The course also includes a field placement where students can apply their knowledge in a real-world setting.

6.

The sixth part of the course is a lecture on the evaluation of social work practice. This is followed by a series of practical exercises designed to help students understand the role of social workers in society. The course also includes a field placement where students can apply their knowledge in a real-world setting.

7.

The seventh part of the course is a lecture on the development of social work practice. This is followed by a series of practical exercises designed to help students understand the role of social workers in society. The course also includes a field placement where students can apply their knowledge in a real-world setting.
